Dear Department of Justice,

It is my humble opinion that now is the time to END the trial against Microsoft. Microsoft is a great company, and has done so much for the way we work and live. It has produced the best software ever made and has put it in the hands of ordinary people. Microsoft may not have been perfect, but they have paid for their indiscretion. What about the indiscretions of the competitors that are making so much noise??

Surely, we don't believe that THEY have none! This is about jealousy, and bringing the leader DOWN. Enough already. Let's get on with it.

Let's start moving forward, not standing still. Let's get COMPATIBLE!

People WANT to be compatible. Anyway, we need to put this this behind us. It will be a sigh of relief for more people than the people who are complaining. To them I say, STOP COMPLAINING AND START CREATING A GREAT PRODUCT.

Thank you.
